

# PURE PUZZLER

## week 5

### Elvis Lives

Your task is to unscramble the three clues below to help you unscramble the name of the person of note at top. Each clue relates specifically to this person somehow.

Once you rearrange the letters of a word properly, the letter in the colored box indicates what letter should appear in the corresponding colored box up top. Conversely, if you solve the name of the person, you can fill in the corresponding colored boxes in the words below with the same letters. Ignore the punctuation. It is only there for the silly scramble.

5 points possible: 2 points for solving the name. 1 point for solving each of the 3 clues.

G	O	D	T	I	R	E	S.	O	W!
---	---	---	---	---	---	---	----	---	----

D	A	R	N	S	O	F	T
N	E	R	D	S	R	O	E
C	L	E	R	K	I	D	

--	--	--	--	--	--	--	--	--	--

## week 5

### Quote in a Box

Your task is to complete the sentence in the box. These are typically famous quotes, but this is not as you are not going to be able to go the Google route here.

The letters in each column will go into the boxes of the same column on the blank grid immediately below but not necessarily in the given order. A black box indicates the end of a word. If there is not a black box at the end of the line, the word continues on the next line. 5 points, all or nothing.

	A	A	O		T	S	E		M	I	E	E	S	S	V	I	A
R		N	D		R	N	O	T	U	R	N	E	S	E	F	U	N
E	E	D	T	N	I	W	P		H	I	M	U	L		Q	I	X
W	H	F		U	I			L	T	S		E			S	E	V

### Cryptogram

A cryptogram is a block of text which has been rendered unreadable through the use of what is called a “substitution cypher”. This means that each letter used in the original text has been substituted with another (G becomes A, F becomes P, etc.). Letter/word positions, spaces and punctuation remain unchanged. You are given one letter substitution to start. 5 points, all or nothing.

D = N
